

BioFlexa III™

BioFlexa III™ Joint Formula

Item No. 0130600. 60 chewable tablets
Item No. 0131500. 150 chewable tablets

Product Facts:

Active Ingredients per Tablet:

Methylsulfonylmethane (PurforMSM®)	500 mg
Glucosamine HCl (Vegetarian Regensure®)	500 mg
Cetyl Esters of Mixed Fatty Acids.....	200 mg (20% Cetyl Myristoleate min.)
Ester-C® (Vitamin C + metabolites).....	150 mg
Chondroitin Sulfate (ChondroPure® easily absorbed Low Molecular Weight molecules at greater than 90% purity).....	125 mg
Hyaluronic Acid (Hyal-Flex™).....	25 mg
Great Salt Lake minerals (OmniMin®)	15 mg
AstraGin™	15 mg

Inactive Ingredients:

Dextrates, Maltodextrin, Microcrystalline Cellulose, Natural Flavorings, Powder Cellulose, Silicon Dioxide, Stearic Acid.

Directions for Use:

For best results, use for a minimum of 30 days. Best taken on a full stomach.

Initial Loading Dosage (week 1-4):

Double the maintenance dosage below.

Maintenance Dosage:

Up to 20 lbs	½ tablet daily
20 - 50 lbs.....	1 tablet daily
50 - 80 lbs.....	2 tablets daily
80 - 110 lbs.....	3 tablets daily
Over 110 lbs	4 to 5 tablets daily

Establishing a Foundation for Joint Health

BioFlexa III™ is Joint Health Phase 3. It is a great tasting supplement intended to provide maximum support for joints affected by age, injury, or lifestyle. BioFlexa III™ contains the same potent ingredients found in BioFlexa II, plus hyaluronic acid, a component of connective tissue only newly incorporated into a supplemental form for maximum effect on dogs suffering from age-related joint problems.

Benefits :

- Only brand-name ingredients are utilized.
- Tasty, scored chewable tablets are easy to administer.
- Economical based on daily dosage per pound of body weight.
- Fast acting; benefits are usually observed within one to two weeks.
- Improves joint mobility by supporting lubrication.
- Speeds up the recovery process after normal daily exercise.
- Provides connective tissue support.
- Improves cellular nutrient absorption.

BioFlexa III™ contains:

MSM (PurforMSM®, methylsulfonylmethane): MSM, one of sulfur's natural forms, is approved by FDA as GRAS (Generally Recognized as Safe). It is an antioxidant that studies have shown can be easily processed by animals, even in high doses. PurforMSM® is the world's finest, 99.9% pure, four-stage distilled form of MSM, patented and manufactured in the USA.

Cetyl Esters of Mixed Fatty Acids: CM Kombo™ An exclusive, highly concentrated form of cetyl myristoleate. This revolutionary compound works to lubricate joints.

Glucosamine HCl: Glucosamine helps maintain synovial fluid that lubricates the joints and stimulates the production of proteoglycans, important for joint and tissue health and resiliency. Regensure® is a US-made vegetarian form of glucosamine.

Hyaluronic Acid: A substance found in the connective tissues which cushions and lubricates the joints.

Chondroitin Sulfate: ChondroPure® Chondroitin is a cartilage component that promotes water retention and elasticity, and inhibits the enzymes that break down cartilage. It contains low molecular weight molecules for superior uptake.

Ester-C® : An innovative form of vitamin C, Ester-C® is a patented, non-acidic vitamin C with metabolites that do not cause acidity problems. It also stays in the body longer than ordinary vitamin C.

Trace Minerals: Derived from Great Salt Lake salts, they are important for health and promote the assimilation and utilization of vitamins and other nutrients.

AstraGin: Helps increase the uptake of active ingredients.
