 Giant breed dogs (over 110 lbs)4-5 tablets daily

Establishing a Foundation for Skin Health

DermGard™ with MSM contains all the essential nutrients to promote healthy skin and a shiny coat in dogs and cats. It incorporates Omega-3 from fish. Fish oil Omega 3 fatty acids (EPA and DHA) are capable of modifying inflammatory skin responses in healthy dogs. Typical pet foods lack Omega 3 but are rich in Omega 6. DermGard™ also includes Omega 6 to balance Omega 3 and 6 contents to the optimal ratio of 1:7, but Omega 6 is not considered a dietary supplement and is therefore not included in the list of guaranteed ingredients. DermGard™ also contains 99.9% pure PurforMSM® and other vitamins and minerals important for skin health.

Benefits :

- Comprehensive blend of synergistic essential dermatological ingredients
- Consistent efficacy; very high approval rating
- Convenient and easy to feed for improved compliance
- Great taste appeal for dogs and cats
- No adverse reaction reported in over 10 million tablets sold
- Compatible with veterinary prescribed therapies
- Uses 99.9% pure, GRAS-designated, patented MSM (PurforMSM®)

DermGard™ with MSM contains:

PurforMSM® (bio-available sulfur): Sulfur is required for the production of collagen and keratin, both essential proteins for the maintenance of healthy skin. MSM, one of sulfur's natural forms, is an antioxidant and detoxifier that studies have shown is safely processed by the body, even in high doses. PurforMSM® is the world's finest and only proprietary, 99.9% pure, four-stage distilled form of MSM for animals, patented and manufactured in the USA.

Essential Fatty Acids: This concentrated dose of human-grade Omega 3 & 6 essential fatty acids are derived from salmon and several vegetarian sources.

Vitamin A: In combination with zinc, vitamin A helps keep skin and membrane cells healthy and moist, creating a natural barrier against bacteria or viruses.

B Vitamins: Supports normal detoxification processes as well as the body's ability to produce sufficient levels of glutathione for overall health.

Vitamin E: Provides antioxidant support for the ability of the essential fatty acids in DermGard™ to deliver their benefits to the skin and coat.

Zinc: Essential for healthy skin and its ability to manage a wide range of environmental pollutants.

DermGard™ Low Allergen Formula contains:

Utilizing nearly the same formula as **DermGard™ with MSM**, this specially blended version uses only plant-based flavorings for those animals particularly susceptible to an adverse reaction from meat or dairy products.
